

Throughout the year, we may make changes to our list of covered drugs (formulary). Changes usually occur to add generic versions of covered brand-name drugs, remove drugs that are considered unsafe by the Food and Drug Administration (FDA), or remove drugs that are no longer made. We generally remove brand-name drugs from our drug list when the generic equivalent is added but may also move the drug to a higher cost-share tier, add new restrictions, or both. Below is the list of changes to our drug list as of the date at the bottom of the page.

Drug Name	What changed?	Why the change?	Alternative Drug Name	Alternative Drug Tier	Change Effective
REVLIMID ORAL CAPSULE 2.5 MG, 20 MG	Removed from our formulary	The generic version is available	<i>lenalidomide oral capsule 2.5 mg, 20 mg</i>	5	2/1/2023

BIDIL ORAL TABLET 20-37.5 MG	Removed from our formulary	Formulary removal	N/A	N/A	4/1/2023

What can I do if I'm affected by a change in the drug list?

If possible, we include an alternative drug that may be appropriate for you. This may not be the only drug we cover to treat your condition. See our full drug list at www.apexhealth.com.

You should speak to your provider about whether a formulary alternative is appropriate for you. If it isn't or if you or your provider think we should continue to cover your drug, an exception may be requested. Your provider will need to tell us why making an exception is medically necessary for you. To learn more about exceptions, please call an ApexAssistant at the number below.

ApexHealth is here to help.

An ApexAssistant can help you understand your options and the changes to our drug list. Call us at (844) 279-0508 (TTY: 711). Our hours of operation are 8 a.m. – 8 p.m. (local time) 7 days a week from October 1 to March 31 and 8 a.m. – 8 p.m. (local time) Monday-Friday from April 1 to September 30.
